

ADRENEVIVE PRODUCT INFO SHEET

Description

AdreneVive provides support for adrenal stress.

Ingredients

Many Americans lead busy lives which can frequently leave us feeling run-down and fatigued. AdreneVive is a mixture of ingredients to help support excess cortisol and reduce the effects of acute cortisol and adrenal stress.

Many of the herbs used in AdreneVive are considered adaptogens. An adaptogen is a substance that nonspecifically increases the resistance of an organism and does not disturb normal biological parameters. Ashwagandha is a traditional herb used in Ayurvedic medicine and it has many reported adaptogenic properties including anti-stress and immunomodulatory. *Siberian ginseng* is approved by the German Commission E monograph as a tonic to help with fatigue and concentration. *Rhodiola rosea* has also been recognized by a few organizations in Europe as an anti-fatigue agent.

L-theanine is an amino acid found predominately in green tea. It has been found to increase dopamine and serotonin production in the brain and increase alpha-brain wave activity, a sign of relaxation.

Lastly, phosphatidylserine is a phospholipid that is found in high concentrations in the brain. Studies show administration of phosphatidylserine to stressed subjects has been found to blunt the effects of cortisol and ACTH.

Dosage

SUGGESTED USE: 2 capsules 1-2 times per day or as recommended by your health care professional.

Contraindications

Do not consume this product if you are pregnant or nursing. Consult your physician for further information.
