

# COLOSTRUM PRODUCT INFO SHEET

## Description

Colostrum is used to support the immune system.

## Ingredients

Historical use of bovine Colostrum in human health dates back several centuries. The enhanced amounts of growth factors and immunoglobulins in Colostrum provide excellent support for a healthy immune system.

The same nutritional support that nurtures and enhances growth right outside the womb has been used for centuries for adult immune system support. Our New Zealand bovine Colostrum is collected within 48 hours of birth and freeze-dried into a powder for encapsulation, making Ortho Molecular Products' Colostrum one of the freshest available.
