

# DHEA 25MG

## PRODUCT INFO SHEET

### Description

DHEA is used to support the endocrine system.

### Ingredients

Dehydroepiandrosterone (DHEA) is the most prevalent naturally occurring hormone in the body produced by the adrenal glands. After DHEA is secreted by the adrenals, it circulates in the bloodstream as DHEA-sulfate and is converted as needed into other hormones. It is a necessary building block for a wide range of important compounds manufactured in the body.

DHEA supplementation may be needed by those who show signs of adrenal exhaustion and fatigue or those with a DHEA deficiency. As we age, our levels of DHEA decrease, additional supplementation with DHEA may be needed.

### Supplement Facts

Serving Size: 1 Tablet

Servings Per Container: 100

	Amount Per Serving	% Daily Value
1 tablet contains		
DHEA	5 mg	*
* % Daily Value not established
