

FEMARIN

PRODUCT INFO SHEET

Description

Femarin provides menopausal support.

Ingredients

Black Cohosh

Has been used historically as a female tonic. The effects of black cohosh root preparations appear to come from components such as isoflavones and cimicifugoside. It is perhaps best known and used for common complaints associated with menopause.

Licorice

Licorice root contains a compound called glycyrrizin which is 50 times sweeter than sucrose (table sugar). Glycyrrizin has a similar structure to adrenal steroids and has been used in adrenal insufficiency, fatigue, various skin problems, as well as female hormonal regulation.

Dong Quai

Considered by many as the womans herb, Dong quai (*Angelica sinensis* (Oliv.) Diels.) is native to China where some consider it the female tonic. The dried roots have coumarins, flavonoids, and essential oils as active constituents.

St. Johns Wort

Nutritional support for positive outlook and mood. Clinical studies continue to show the beneficial effects of St. Johns wort.

Chaste Berry

Often used alone for menstrual support, chaste berry has a long history of providing aggressive support for healthy menstrual cycles. Chaste berry is excellent at mediating high levels of prolactin.
