

PARACID FORTE PRODUCT INFO SHEET

Description

Ingredients

Olive Leaf Ext.: A potent gastrointestinal antiseptic agent for a range of organisms. Oregano: Most of the activity of oregano comes from the volatile oils which have been shown to have strong anti-worming activities. Oregano leaves have been used traditionally for almost every ailment concerned with the respiratory and digestive system. Goldenseal: The roots and rhizomes, which are golden yellow in color, are the portion used medicinally. Goldenseal contains significant amounts of berberine alkaloids, hydrastine and canadine. These berberine alkaloids are excellent, non-specific agents. Grapefruit (Seed) Extract: The extract of the inner rind and seeds of grapefruits (*Citrus racemosa*) is becoming known as one the best topical and internal antiseptics one can find. Popularized by the trade name Citricidal, grapefruit seed extract is bacteriostatic as well as bacteriocidal at various concentrations. It has also been shown to be very effective against parasitic organisms such as giardia. Berberine Sulfate: Contains significant amounts of berberine alkaloids. These berberine alkaloids are excellent agents.
