

REACTED MG & K PRODUCT INFO SHEET

Description

Reacted mineral products provide a full spectrum of fully bioavailable minerals.

Ingredients

Minerals play an important role in many different systems and structures throughout our body. Often times we may need higher amounts of a specific mineral to provide support for a particular health concern. Ortho Molecular Products' line of fully reacted minerals provides a comprehensive assortment of minerals to support your needs.

We have partnered with Albion, one of the United States foremost manufacturers of chelated minerals. Albion's patented chelation technology stabilizes the minerals while creating some of the smallest absorbable minerals available. This is important because larger minerals cannot pass through the intestinal wall as well and therefore are not as well absorbed by our bodies.
