

SINATROL

PRODUCT INFO SHEET

Description

Support for those with sinus related issues.

Ingredients

Licorice: Licorice contains an active component called glycyrrhizin. Licorice has traditionally been used to soothe respiratory complaints. **Turmeric:** Curcumin is a well studied component of turmeric. Curcumin has been shown to inhibit leukotriene (major inflammatory mediators) formation, inhibit platelet aggregation, inhibit neutrophil responses under certain conditions, and stabilize lysosomal membranes. These activities have made curcumin one of the most useful anti-inflammatory agents in nature. **Bromelain:** Term used to describe a group of enzymes derived from the stem and fruit of the pineapple plant (*Ananas comosus*). It has been used as an anti-inflammatory agent in both gross injury type swellings (surgery, trauma injury, sprains; for which it received an "Approved" status by the German Commission E) as well as micro inflammations (allergic reactions, localized internal infections). **Thyme:** The German Commission E monographs approve Thyme for upper respiratory conditions. Thyme contains thymol, a strong antifungal and all-around antiseptic agent. **Berberine Sulfate:** Contains significant amounts of berberine alkaloids. These berberine alkaloids are excellent sinus supporting agents.

Supplement Facts

Serving Size: 3 Capsules
Servings Per Container: 20

3 capsules contain	Amount Per Serving	% Daily Value
N-Acetyl-L-Cysteine USP	750 mg	*
