

TRIPLICHOL PRODUCT INFO SHEET

Description

Triplichol is a comprehensive formula designed to help maintain cholesterol levels already within normal range.

Ingredients

Cardiovascular health is an important issue to many patients. Cardiovascular health issues can be complex and involve many different issues, often requiring patients to take multiple supplements from many different packages. Triplichol is a comprehensive product that contains four well researched ingredients for the maintenance of cholesterol levels already within normal range, all within a convenient packet.

Fish oil contains EPA and DHA, two well studied omega-3 fatty acids for cardiovascular health. The FDA has allowed the following health claim for EPA and DHA: Supportive but not conclusive research shows that consumption of EPA and DHA omega-3 fatty acids may reduce the risk of coronary heart disease. Triplichol contains two fish oil softgels in each daily serving, providing high doses of both EPA and DHA.

Plant sterols are structurally very similar to cholesterol and have been found to compete with cholesterol for absorption. Foods containing at least 0.65 g per serving of plant sterol esters, taken twice daily with meals for a daily total intake of at least 1.3 g, as part of a diet low in saturated fat and cholesterol, may reduce the risk of heart disease. Pantethine is the precursor to cysteamine and pantothenic acid. While pantothenic acid plays a role in energy production, it is believed that cysteamine plays a role in cardiovascular health. Triplichol provides 900 mg of pantethine per serving.

Niacin is a B vitamin and has been used for years to support cardiovascular health. The NCEP (National Cholesterol Education Panel) recognizes niacin for maintaining blood lipid levels that are already within normal range. Certain forms of niacin can cause flushing in some patients, our time release niacin reduces the flushing that can often accompany many immediate release forms.

Dosage

SUGGESTED USE: 2 packets per day with a meal or as recommended by your health care professional.

Contraindications

If you are pregnant or nursing, consult your physician before taking this product. This product contains the following potential allergies: soy and corn.
