

VESSELMAX

PRODUCT INFO SHEET

Description

Vessel Max is intended for the support of the venous system.

Ingredients

Butchers Broom: Butcher's Broom (*Ruscus aculeatus* L.) is a short evergreen shrub, native to the Mediterranean region. This plant has recorded medicinal use as early as the first century, but has been a focus of studies in venous disorders primarily in the past 40 years. Ruscogenins, an active ingredient in butchers broom, play a major role in its activity. These compounds have demonstrated a wide range of pharmacological actions. Extracts of butcher's broom have also been shown to inhibit elastase, an enzyme involved in the decreased tone of veins. **Gotu Kola:** The freshly-dried leaves of the Gotu Kola plant (*Centella asiatica* L.) have been used medically for a variety of concerns throughout China, East Asia, and Africa for many years. Gotu kola has the ability to enhance connective tissue, increasing the tone of vessels, tendons, and ligaments. This activity has been confirmed in several clinical trials, in which edema, pain, decreased capillary permeability, and microcirculation were all improved significantly without adverse effects. The use of this herb is becoming more frequent for a number of connective tissue, vascular, and wound healing protocols. The safe use of this herb and its extracts has been confirmed by many studies.

Supplement Facts

Serving Size 3 Capsules
Servings Per Container 15

3 capsules contain	Amount Per Serving	% Daily Value
Troxeutin	600 mg	*
Horsechestnut Seed Extract (Standardized to contain 20% Aescin)	500 mg	*
Butcher's Broom (Standardized to contain 9-11% ruscogenins)	200 mg	*
